

Install VLC on Windows for IPTV

Follow these steps to install VLC and open the M3U Plus playlist supplied by your IPTV provider.

1. Download and install

Official VLC download:

<https://www.videolan.org/vlc/download-windows.html>

1. Open the official VLC download link above.
2. Select **Download VLC**.
3. Open the downloaded setup file.
4. Select **Yes** if Windows asks for permission.
5. Follow the installation prompts and open **VLC media player**.

2. Load your IPTV playlist

1. In VLC, select **Media** from the top menu.
2. Select **Open Network Stream**. You can also press **Ctrl + N**.
3. Paste the complete **M3U Plus URL** supplied by your IPTV provider.
4. Select **Play**.
5. Wait for VLC to download and process the playlist.

Network URL: YOUR FULL M3U PLUS URL

3. Open the playlist and choose a channel

1. Once the playlist has loaded, select the **Toggle Playlist** button at the bottom of VLC.
2. You can also open it from **View > Playlist** or press **Ctrl + L**.
3. Browse or search through the loaded playlist.
4. Double-click a channel to start watching it.
5. Select the **Toggle Playlist** button again to return to the video.

Important: Large playlists containing many channels, movies and series can take several minutes to load. VLC is not recommended for slower or older PCs because very large playlists may load slowly or make the program less responsive.
